

Scribus User Survey

This survey is meant to be a short demo of some of the features of an interactive form, as well as giving the developers some feedback on the progress of Scribus. The interactive PDF features are only available in the Adobe Acrobat Reader (5.0.6 is suggested). Ghostview and other PDF viewers do not have the javascript support necessary to properly display the form. The opening is a demo of presentation effects you can create in Scribus.

Instructions

It is rather simple. Follow and answer each question. As you progress there will be fields and mouse overs which will demo some - not all of the features you can create in an interactive PDF form with Scribus. When you see a icon, right click and select open. After finishing, "print" a ps file from the printer dialog of Acrobat Reader. Then, from the console in the same directory, type: **ps2pdf ./surveyreply.ps surveyreply.pdf** and then mail it as an attachment to: **netscribe@attbi.com**

Which Distribution / Version do you use ?

Did you compile or install a package ?	Compile	Package
--	---------	---------

Have you used other DTP applications like Quark, Indesign, Pagemaker or Ventura before ?	Yes	No
--	-----	----

Which is your favorite feature in Scribus?

Please tell us which types of documents you create with Scribus?

Would you be willing to help with some structured testing of Scribus?	Yes	No
---	-----	----

Which feature would you like added to Scribus ?
